

## Equipment Inspection Policy

1. All boats and equipment are visually inspected at the time of issue on club nights.
2. Any defects found are to be reported to the Club committee and logged in the equipment repair book.
3. The club equipment officer or duty person can decide if the defects are safety critical then item is to be removed from service until repairs can be made.
4. If the defect is not safety critical then the item can continue to be used and the repair carried as soon as possible.
5. At the end of the season (Mid-October) all equipment will have a thorough examination by a committee member. This examination will be noted on the club equipment register. Any defects will be noted in the Equipment repair book and scheduled for repair.
